

# Glasgow City Council - Waste Services Strike

“In light of [Glasgow City Council's](#) waste services strikes starting from 24th August 2022 the Association is keen to ensure we minimise the accumulation of refuse in and around the bin area, as this poses an environmental & health and safety concern. We would also residents to only put out refuse if absolutely necessary as these collections will only be uplifted once Glasgow City Council-waste services have resumed normal operations.

Our subsidiary contractor Upkeep will continue to operate the backcourt maintenance & bulk uplift services as normal, and will seek to minimise waste accumulations where possible.

Your co-operation and assistance is welcomed.”
