

PROJECT FUNDING

Project costs and funding are mainly capital related and can cover a number of projects such as the development of new or refurbished homes, the investment in major component replacements in our properties such as new roofs, bathrooms, kitchens, windows or it can be the investment in the Associations IT infrastructure.

Depending on the type of project, funding can come from various sources but mainly from the Scottish Government by way of Grant funding or from a high street Lender by way of a mortgage. Tenants rent money may also be used to fund projects too.
