

Dont forget: Vote in our rent consultation

Please note that our rent consultation will end this Friday 10th February.

7%

The proposed 7% increase would allow us to invest £3.05 M in improvements to tenants homes in 2023/24.

in particular to install new, more energy efficient gas boilers in 275 homes. Replacement boilers will help tenants keep fuel bills under control.

This is stage one in a plan to replace 650 boilers in the next 3 years thereby benefiting over a quarter of all tenant households whose boilers are more than 15 years old.

For more details on the proposals and how to respond please see our website:
